License for Diversion and Use of Water

Page 1 of 4

APPLICATION 8512B

PERMIT 4760

LICENSE 5064B

THIS IS TO CERTIFY, That

Richard Crain and Lilly Crain
850 Friessen Drive
Angwin, CA 94508

have made proof as of October 10, 1957 (the date of inspection) to the satisfaction of the State Water Resources Control Board of a right to the use of the waters of
an Unnamed Stream in Napa County

tributary to **Angwin Creek thence Conn Creek thence Napa River**

for the purpose of **Irrigation, Domestic, Stockwatering, and Recreational uses**

under Permit 4760 of the Board and that the right to the use of this water has been perfected in accordance with the laws of California, the Regulations of the Board and the permit terms; that the priority of this right dates from **December 2, 1935** and that the amount of water to which this right is entitled and hereby confirmed is limited to the amount actually beneficially used for the stated purposes and shall not exceed **8 acre-feet per annum** to be diverted from **October 1 of each year** to **May 1 of the succeeding year.**

THE POINT OF DIVERSION OF SUCH WATER IS LOCATED:

South 990 feet and East 1,520 feet from the NE corner of Section 36, T9N, R6W, MDB&M; being within SE $\frac{1}{4}$ of NW $\frac{1}{4}$ of projected Section 31, T9N, R5W, MDB&M.

APPLICATION 8512B

Page 2 of 4

A DESCRIPTION OF THE LANDS OR THE PLACE WHERE
SUCH WATER IS PUT TO BENEFICIAL USE IS AS FOLLOWS:

Domestic, Stockwatering, and Irrigation of 36 acres within W $\frac{1}{2}$ of NW $\frac{1}{4}$ and SE $\frac{1}{4}$ of NW $\frac{1}{4}$ of projected
Section 31, T9N, R5W, MDB&M.

Recreational at Red Lake within SE $\frac{1}{4}$ of NW $\frac{1}{4}$ of projected Section 31, T9N, R5W, MDB&M.

Licensee shall allow representatives of the State Water Resources Control Board and other parties, as may be authorized from time to time by said Board, reasonable access to project works to determine compliance with the terms of this license.

The quantity of water diverted under this license is subject to modification by the Board if, after notice to the licensee and an opportunity for hearing, the Board finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to Division 7 of the Water Code.

No action will be taken pursuant to this paragraph unless the Board finds that (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges.

Pursuant to California Water Code Sections 100 and 275 and the common law public trust doctrine, all rights and privileges under this license, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use or unreasonable method of diversion of said water.

This continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this license with a view to eliminating waste of water and to meeting the reasonable water requirements of licensee without unreasonable draft on the source. Licensee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this license and to determine accurately water use as against reasonable water requirement for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the licensee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Sec. 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.

Reports shall be filed promptly by licensee on appropriate forms which will be provided for the purpose from time to time by the Board.

The right hereby confirmed to the diversion and use of water is restricted to the point or points of diversion herein specified and to the lands or place of use herein described.

This license is granted and licensee accepts all rights herein confirmed subject to the following provisions of the Water Code:

Section 1625. Each license shall be in such form and contain such terms as may be prescribed by the Board.

Section 1626. All licenses shall be under the terms and conditions of this division (of the Water Code).

Section 1627. A license shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code) but no longer.

Section 1628. Every license shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a license is issued takes the license subject to the conditions therein expressed.

Section 1629. Every licensee, if he accepts a license does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any license granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any licensee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any licensee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

Section 1630. At any time after the expiration of twenty years after the granting of a license, the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State shall have the right to purchase the works and property occupied and used under the license and the works built or constructed for the enjoyment of the rights granted under the license.

Section 1631. In the event that the State, or any city, city and county, municipal water district, irrigation district, lighting district, or political subdivision of the State so desiring to purchase and the owner of the works and property cannot agree upon the purchase price, the price shall be determined in such manner as is now or may hereafter be provided by law for determining the value of property taken in eminent domain proceedings.

DIVISION OF WATER RIGHTS
ORDER

Application 8512 Permit 4760 License 5064

**ORDER ALLOWING CORRECTION TO SOURCE,
ISSUANCE OF SEPARATE LICENSES, AND
REVOCATION OF ORIGINAL LICENSE**

WHEREAS:

1. License 5064 was issued to Dick R. Friesen and Pacific Union College Association on April 10, 1958 pursuant to Application 8512 and recorded with the County Recorder of Napa County on April 18, 1958.
2. License 5064 was subsequently assigned to Howell Mountain Mutual Water Company, Inc. on March 24, 1986.
3. By letter dated January 22, 1997, a request has been made for separate licenses to reflect the individual ownerships of licensees as the result of a land exchange between licensee and the Crains.
4. The State Water Resources Control Board (SWRCB) staff has determined a correction is needed to identify the source to be consistent with the current stream system identified on the U.S.G.S. St. Helena quadrangle.
5. The SWRCB has determined the correction to the source does not constitute the initiation of a new right nor operate to the injury of another lawful user of water, and that good and sufficient cause has been shown for the correction, and subsequent issuance of separate licenses.
6. The license condition pertaining to the SWRCB's continuing authority should be replaced with the current version to conform with the Section 780(a), Title 23 of the California Code of Regulations.

NOW, THEREFORE, IT IS ORDERED THAT:

1. The description of the source under this license shall be corrected as follows:

Unnamed Streams and Angwin Creek tributary to Conn Creek thence Napa River.

2. License 5064 be replaced by License 5064A issued to Howell Mountain Mutual Water Company, Inc. and License 5064B issued to Richard Crain and Lilly Crain.
3. Superseded License 5064 is hereby revoked upon issuance of License 5064A and 5064B.
4. Separate licenses be issued as follows

5. The license condition pertaining to the continuing authority of the SWRCB is updated to conform to Section 780(a), Title 23 of the California Code of Regulations and reads as follows:

Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this license including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this license with a view to eliminating waste of water and to meeting the reasonable water requirements of licensee without unreasonable draft on the source.

Licensee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to:

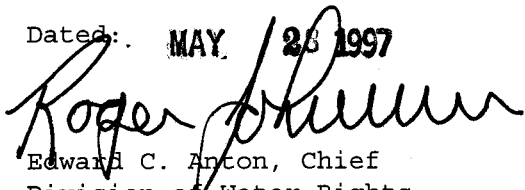

- (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated;
- (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing,

maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the licensee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust. (0000012)

6. Licenses 5064A and 5064B shall contain all other terms and conditions presently in License 5064 or the updated versions for compliance with the SWRCB policy.

The maximum rate of diversion to offstream storage has been 2 cubic feet per second.

A description of the lands or the place where such water is put to beneficial use is as follows:

280 acres within regular, fractional and/or projected Section 5, 6 and 8, T8N, R5W, Section 31, T9N, R5W, and NE $\frac{1}{4}$ of Section 36, T9N, R6W, MDB&M for irrigation purposes and within Sections 31, and 32 and Section 33, T9N, R5W, MDB&M; Sections 5, 6, 7, and 8, and Sections 18 and 19, T8N, R5W; Sections 1 and 12 and Sections 13 and 24, T8N, R6W; and Sections 25 and 36, T9N, R6W, MDB&M for domestic, stockwatering and recreational purposes as shown on map filed with State Water Rights Board.

All rights and privileges under this license including method of diversion, method of use and quantity of water diverted are subject to the continuing authority of the State Water Rights Board in accordance with law and in the interest of the public welfare to prevent waste, unreasonable use, unreasonable method of use or unreasonable method of diversion of said water.

Reports shall be filed promptly by licensee on appropriate forms which will be provided for the purpose from time to time by the State Water Rights Board.

The right hereby confirmed to the diversion and use of water is restricted to the point or points of diversion herein specified and to the lands or place of use herein described.

This license is granted and licensee accepts all rights herein confirmed subject to the following provisions of the Water Code:

Section 1625. Each license shall be in such form and contain such terms as may be prescribed by the board.

Section 1626. All licenses shall be under the terms and conditions of this division (of the Water Code).

Section 1627. A license shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code) but no longer.

Section 1628. Every license shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a license is issued takes the license subject to the conditions therein expressed.

Section 1629. Every licensee, if he accepts a license does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any license granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any licensee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any licensee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

Section 1630. At any time after the expiration of twenty years after the granting of a license, the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State shall have the right to purchase the works and property occupied and used under the license and the works built or constructed for the enjoyment of the rights granted under the license.

Section 1631. In the event that the State, or any city, city and county, municipal water district, irrigation district, lighting district, or political subdivision of the State so desiring to purchase and the owner of the works and property cannot agree upon the purchase price, the price shall be determined in such manner as is now or may hereafter be provided by law for determining the value of property taken in eminent domain proceedings.
